In each number at least three books are selected to receive full *critical notice* by experts on the subjects of which they treat; while under the head *New Books* is given a general account of the aim and contents of all recently published works of any importance which are within the scope of the Review.

There also appears, under the head *Philosophical Periodicals*, a list of the titles and an indication of the contents of the articles in the leading philosophical journals, English and foreign, with a further notice of those which appear to be of special importance. *Notes* on recent researches and current news conclude each number.
